

SCIENTIFIC DESIGN COMPANY, INC.

A SABIC – Clariant Partnership Company

Company Overview

Scientific Design (SD) is a World Leader in the development and licensing of proprietary processes for the production of ethylene oxide and glycol (EO/EG), ethylene oxide derivatives, polyols and maleic anhydride. Our technologies are used in a multitude of products including polyesters, plastic bottles and consumer products. In addition, SD offers world class proprietary catalysts and equipment for use in its processes. With over 350 patents, and significant investments into Research and Development, SD continues to innovate and provide solutions as a technology based company.

History

SD was founded in 1946 by Dr. Ralph Landau. SD played a major role in the development of several chemical technologies – EO/EG, Maleic Anhydride, Propylene Oxide, Terephthalic Acid, Cyclohexanol/Cyclohexanone. In 2003, SD was acquired as a 50/50 joint venture between SABIC and Süd-Chemie (now Clariant). For over 70 years, SD has been developing for, licensing to, and selling in the global chemical industry.
