

## Univation Technologies, LLC

Univation Technologies is the leading polyethylene technology licensor to the worldwide PE industry with over 165 licensed UNIPOL™ PE Reactor lines in 28 countries and over 48 million tonnes annually global licensed capacity. Univation licenses the world-class UNIPOL™ PE Technology, manufactures and supplies innovative polymerization catalysts, and delivers value-enhancing products and services to enable polyethylene producers to capture new opportunities and maximize their return on investment in every region of the world.

UNIPOL™ PE Technology provides a full density range of PE products – including bimodal and unimodal HDPE, conventional LLDPE, and metallocene LLDPE – all manufactured in a single-reactor platform. This unique capability allows for unmatched flexibility to capture new polyethylene market opportunities and satisfy your customer's ever-evolving product needs.

Whether your goal is to grow with new market demand, upgrade the value of your ethylene stream or take advantage of new feedstock supplies, you will face a complex set of business and technology decisions. Collaboration with Univation, supported by our team of experts and over 50 years of operating experience, gains you access to market-focused technology solutions that are cost-effective and deliver long-term business sustainability.

Please see our Univation Technologies conference advertisement provided in the India Petrochem 2018 conference book.
