

World-class Solutions for your Polyester, Polyamide, Polylactic Acid and Co-Polyester plants from ThyssenKrupp Industrial Solutions

With over 500 successfully-implemented projects across the globe, ThyssenKrupp Industrial Solutions, through its group Companies Uhde Inventa-Fischer and TKIS-India, remains the 'partner of choice' for Polyester, Polyamides, Polylactic Acid and Co-polyester plants.

Our synergy translates effectively into state-of-the-art plants that stand out for their economical processes, longevity, product quality and environmental considerations.

Uhde Inventa-Fischer GmbH belongs to the Polymer Division of ThyssenKrupp Industrial Solutions AG. Its core competence lies in the design and construction of state-of-the-art polymerization plants for polyesters, polyamides, and polylactic acid, all of which are used in a variety of industries ranging from textile, bottle manufacturing, films, packaging and engineering plastics. These plants are based on proprietary, patented polycondensation process technologies and key equipment developed, tested and optimized at companies' proprietary pilot plants and laboratories.

The company's experience is reflected in its experience spanning almost 100 years, and over 400 successfully-operating plants worldwide. For more information, please click on this link:
